

# Nirupam Granite

*Luxury Stones for Home Decor*

# PROCESSING OF STONES

- The Stone blocks are hand selected from reputed mines in Rajasthan.
- The Blocks are then taken to the factory where they are put under a large multicutter and processed into several granite slabs.
- The Slabs are then moved to the polishing facility to enhance the shine and lusture of the slab.
- The Granite slabs are now completely ready to be dispatched and to fulfill the requirements of our customers in India and abroad.
- The difference between the granite slabs processed by us and other countries is that of hardness, thickness and quality. We are better in the above mentioned fields by a huge margin.

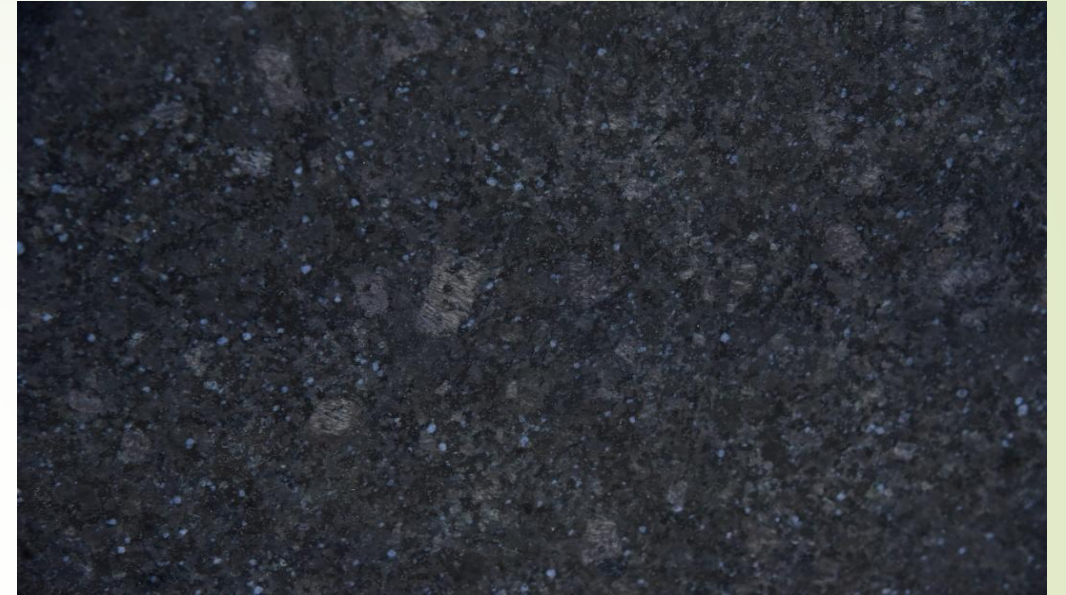

# BLACK NOIR (Black Galaxy)
